

SOLUTIONS

Money/Time savers

- Reduce outsourced analytical testing — approximately \$750 to \$2,000 per sample.
- Eliminate hand calculations.
- Save and reuse Formulas to create new Formulas that are similar in design.
- Develop NLEA-compliant Labels, both adult and child formats.
- Create DSHEA supplemental formats.
- Automatically build Ingredient Statements.

- Add cost to each ingredient — automatically calculate Formula cost.
- Generate Allergen statements from Ingredients or Formulas.
- Add Nutrient content claims.

Quality assurance

- Audit trails – Document changes to Formulas.
- HACCP guidelines.
- Production sheets.
- Allergen identifiers.

Formulation options

- Build Formula prototypes to instantly see nutrient values.
- Nested Formulas can be added as many layers deeply as needed.
- Create new Formulas from existing Formulas.
- Build Formulas based on weight, percentage, serving size, volume measure or a combination thereof.

Sales/ Customer service

- E-mail Formulas as text or graphic images.
- Add images to your Label display.
- Export reports and finished Labels.
